**Bricklayers and Allied Craftworkers Local 5
New York Pension Plan**

Actuarial Valuation Report
12/31/2012

1236 Brace Road, Unit E
Cherry Hill, NJ 08034
(856) 795-7777

December 2013

December 11, 2013

Board of Trustees
Dickinson Group, LLC
50 Charles Lindbergh Blvd, Ste 207
Uniondale, NY 11553

Dear Trustees,

The following is our actuarial valuation Bricklayers and Allied Craftworkers Local 5 New York Pension Plan as of December 31, 2012.

In completing the actuarial valuation of the Plan, a number of studies are made. The two major areas that our report addresses are accommodating the Pension Protection Act (PPA) and the long-term funding of the Plan. The two yardsticks that measure PPA compliance, funded percentage and the life expectancy of the credit balance are emphasized in this report and are forecast in detail.

We appreciate the opportunity to have made this study for you. We look forward to going over this report with you in person.

Respectfully,

A handwritten signature in black ink, appearing to read "Craig A. Voelker". The signature is fluid and cursive, with a long horizontal stroke at the end.

Craig A. Voelker
EA No.: 11-05537

7.7	Distribution of Separated Vested Participant Accrued Monthly Pensions	35

1. Certification of Results

This report was prepared on behalf of the based on employee data, asset statements and Plan documents provided by the Plan Sponsor or its representatives. We relied upon the data as submitted, without formal audit. However, the data was tested for reasonableness, and we have no reason to believe that any other information which would have had a material effect on the results of this valuation was overlooked.

Therefore, to the best of our knowledge and belief, the information presented in this report is complete and accurate, and in our opinion, each assumption used represents our best estimate of anticipated experience under the Plan.

Certified by:

**** *This Page Has Been Left Intentionally Blank* ****

2. Valuation Summary

1. Long-Term Funding

Projected annual contributions of \$2.57 million (\$13.39 per hour) fall short of the Plan's total annual cost of benefits of \$4.85 million (\$25.26 per hour). This leaves a negative margin of \$2.28 million (\$11.87 per hour). Therefore, the Plan's finances are currently not meeting the 15-year funding policy.

2. Margin

The margin has decreased by \$3.15 from negative \$8.72 to negative \$11.87 over last year primarily due to the continued recognition of poor asset experience and the increase in liabilities due to assumption changes. These changes were partially offset by the Plan Amendment suspending all adjustable benefits until 2017. The margin is explained in Section 4.

3. Pension Protection Act

The Pension Protection Act (PPA) requires that multiemployer plans disclose the percent level of funding using the actuarial value of assets. As of 12/31/2012 the Plan's funding level is 38.5%.

The funded level is below 65% and the Plan is projected to have a funding deficiency within four years. As a result, the Plan continues to remain in the "red" zone or Critical Status.

Each year the Rehabilitation Plan needs to be monitored and updated if it is not providing the anticipated funding progress. The Rehabilitation Plan adopted by the Trustees is considered a "safety valve" plan as allowed by §432(e)(3)(A)(ii). This section provides that the Trustees consider all reasonable measures to exit the Red Zone by the end of the Rehabilitation Period, and if the Plan cannot exit the Red Zone in that time frame to consider all reasonable measures to exit at a later time or to forestall insolvency. The Rehabilitation Plan and future projections are detailed in Section 4.6.

Potential Insolvency: In the past the Board was cautiously optimistic that the Fund would not go insolvent. If this perspective changes, and the Trustees believe the Fund will go insolvent, they should discuss the benefit suspensions and suspended accrual.

4. Assumptions

We have changed the following assumptions since our previous valuation:

Interest Rate: from 7.25% to 6.75%.

Mortality: we have removed the 3 year set forward on the male mortality

Retirement: To coincide with the suspended benefits we have changed our retirement assumption for both active and inactive vested participants to be 100% at age 65.

We will continue to monitor the Plan's experience and recommend assumption changes as necessary.

3. Summary of Funding Measures

		<u>As of December 31</u>	
		<u>2012</u>	<u>2011</u>
1. Current			
<u>Assets</u>			
a	at Market	\$ 26,128,846	\$ 27,201,622

i	Total Cost (g+h)	\$ 4,850,026	\$ 4,245,527
j	Margin (b-i)	\$ (2,279,146)	\$ (1,674,647)
 3. Assumptions			
a	Interest rate per annum	6.75%	7.25%
b	Hours		
	In aggregate per year	192,000	192,000
	Per member per year	1,067	1,000

4. Plan Cost

4.1 Annual Plan Cost and Margin

There are two component costs to funding a pension plan: the cost of benefits earned in the year, and the amortization of the unfunded liability. The costs above are calculated consistent with a funding policy of paying off the unfunded liability over 15 years assuming asset return of 6.75% annually.

The margin, found on Line C below, indicates that the Plan requires an additional \$11.87 per hour to pay for all future benefits.

There are many actuarial measures and statistics to measure the state of the Plan's funding. The margin is designed to provide a single simplified statistic for a trustee to get a sense for the Plan's level of funding. As long as the margin is positive it is a strong indication that the current benefits are affordable on a long-term basis. If negative, it is an indication that the overall funding may need to be improved before benefits are affordable.

	<u>Per Year</u>	<u>Per Hour</u>	<u>As a % of Contributions</u>
A. Anticipated annual contribution	\$ 2,570,880	\$ 13.39	100.0%
B. Actuarial Costs			
1. Cost of benefits earned in the year*	\$ 295,212	\$ 1.54	11.5%
2. Amortization of unfunded liability	<u>4,554,814</u>	<u>23.72</u>	<u>177.2%</u>
3. Total annual costs (1+2)	\$ 4,850,026	\$ 25.26	188.7%
C. Margin (B4 - C3)	\$ (2,279,146)	\$ (11.87)	-88.7%
D. Effective Amortization	Does not fund		

Note: The 15-year period for amortizing the Plan's unfunded liability is an ongoing one, in that it is reset at 15 years each time the annual actuarial valuation is completed.

* Since benefit accruals have been frozen as of 1/1/2012, this number only represents administrative expenses.

4.2 Margin Detail

A. As of	<u>12/31/2012</u>		
1. Actuarial liability	\$ 70,599,287		
2. Actuarial value of assets	<u>27,162,775</u>		
3. Unfunded actuarial liability (1 - 2)	\$ 43,436,512		
4. Normal cost	0		
5. Expenses	<u>285,000</u>		
6. Total cost of benefits (4 + 5)	\$ 285,000		
7. Amortization of unfunded liability	\$ 4,397,252		
B. Anticipated Contribution Income*			
1. Number of actives	180		
2. Projected hours	1,067		
3. Projected contribution rate	<u>\$ 13.39</u>	<u>\$/Hour</u>	<u>As a % of Contributions</u>
4. Anticipated annual contribution (1 x 2 x 3)	\$ 2,570,880	\$13.39	100.0%
C. Actuarial Costs*			
4. Cost of benefits earned in the year	\$ 295,212	\$ 1.54	11.5%
5. Amortization of unfunded liability	<u>4,554,814</u>	<u>23.72</u>	<u>177.2%</u>
6. Total annual costs (1+2)	\$ 4,850,026	\$ 25.26	188.7%
D. Margin (B4 - C3)	\$ (2,279,146)	\$ (11.87)	-88.7%
E. Market value of assets	\$ 26,128,846		
F. Spread Statistic	-4.0%		
G. Margin using assets at market	\$ (2,387,564)	\$ (12.44)	-92.9%

* Assumes contributions and costs are paid at the end of the month.

4.3 Reconciliation of Margin

	<u>Dollars Per Hour</u>
A. Margin as of 12/31/2011	\$ (8.72)
B. Effect of:	
1. Contribution increase	\$ 0.00
2. Plan amendments	3.18
3. Passage of time	<u>(0.45)</u>
4. Subtotal	\$ 2.73
Actuarial Experience:	
5. Demographic experience	\$ 0.76
6. Expense experience	0.04
7. Asset experience	<u>(0.81)</u>
8. Subtotal actuarial experience	\$ (0.01)
Methods and Assumptions:	
9. Change in employment assumption	\$ (1.74)
10. Change in operational expense assumption	(0.02)
11. Other assumption change related	(4.11)
12. Method change	<u>0.00</u>
13. Subtotal methods and assumptions	\$ (5.87)
C. Total change in margin	\$ (3.15)
D. Margin as of 12/31/2012	\$ (11.87)

4.4 Development of Plan Asset Values

4.4.1 Market Value of Assets

	<u>Total Fund</u>
A. Assets at 12/31/2011	\$ 27,201,622
B. Employer contributions	2,016,684
C. Investment income:	
1. Interest and dividends	\$ 680,128
2. Realized/unrealized gain/(loss)	2,103,240
3. Investment fees	<u>(172,392)</u>
4. Total investment income	\$ 2,610,976
D. Distributions:	
1. Benefit payments and annuity purchases	\$ (5,488,392)
2. Administrative expenses	<u>(212,044)</u>
3. Total distributions	\$ (5,700,436)
E. Market value as of 12/31/2012	\$ 26,128,846
F. Average invested assets (A+.5 x (B+D3))	\$ 25,359,746
G. Rate of return, C4÷ F	10.3%

4.4.2 Actuarial Value of Assets

A. Market value as of 12/31/2012	\$26,128,846
----------------------------------	--------------

Development of Amount Deferred

<u>Year Ending December 31</u>	<u>Unexpected Amount</u>	<u>Percentage Deferred</u>	<u>Deferred Amount</u>
2009	\$ 1,258,199	20%	\$ 251,640

H. Change due to:	
1. Assumption changes	\$ 8,130,603
2. Plan amendments	(4,516,272)
3. Method changes	<u>0</u>
4. Subtotal changes	\$ 3,614,331
I. Actual unfunded accrued liability as of 12/31/2012 (F+H4)	\$ 43,436,512
J. Gain/(loss) due to:	
1. Asset experience	\$ (1,578,321)
2. Expenses	78,716
3. Demographic experience	<u>(829,018)</u>
4. Total gain/(loss)	\$ (2,328,623)

4.5 Historical Information

4.5.1 Gain/(Loss)

<u>Plan Year</u>	<u>Assets</u>	<u>Expense</u>	<u>Demographic Assumptions</u>	<u>Total Gain/(Loss)</u>
2010	\$ (859,829)	\$ 96,282	\$ 152,762	\$ (610,785)
2011	(1,538,401)	63,068	(316,944)	(1,792,277)
2012	(1,578,321)	78,716	(829,018)	(2,328,623)
3-yr Avg	\$ (1,325,517)	\$ 79,355	\$ (331,067)	\$ (1,577,228)

Gain/loss analysis is one of the most important tools available to an actuary to ensure that the actuary's model of the Plan's funding is accurate. The exhibit above shows the total gain/(loss) broken down into three components: assets, expenses, and demographic assumptions.

The gain on assets is very unpredictable due to the unpredictable returns on the market value of assets. Moreover, the gain/(loss) on assets is greatly influenced by the smoothing method. The pattern of asset gains is discussed later in this report.

After itemizing the gain/(loss) on assets and administrative expenses, what remains is the gain/(loss) on all the other demographic assumptions including retirement, turnover, disability, and mortality rates. Over time, to remain confident in the future funding, it is important that the gains and losses on the demographic assumptions average zero, or at least a relatively small number. The Plan experienced more deaths than anticipated during in the past year, which accounted for a significant portion of this year's gain.

The past three years the Plan has had a small gain followed by two losses. We have changed our mortality assumption and interest rate assumption. We will continue to monitor this experience and recommend assumption changes as necessary.

4.5.2 Asset Information

For Plan Years Ending December 31

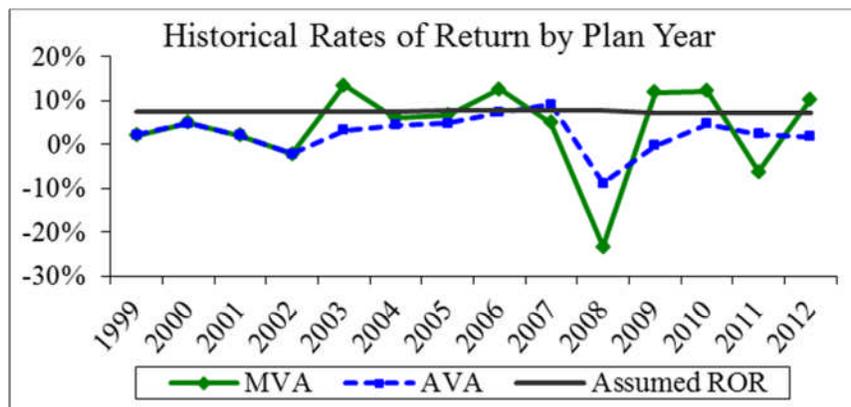

Rates of Return

<u>Plan Year</u>	<u>Market Value</u>				<u>Market Investment Income</u>	<u>Rates of Return</u>	
	<u>of Assets</u>	<u>Contributions</u>	<u>Benefits</u>	<u>Expenses</u>		<u>At Market</u>	<u>At Actuarial</u>

2009	32,154,846	2,009,200	(5,142,691)	(281,874)	3,603,290	11.9%	-0.4%
2010	32,828,413	2,480,621	(5,289,710)	(256,784)	3,739,440	12.2%	4.7%
2011	27,201,622	<u>1,992,893</u>	<u>(5,432,225)</u>	<u>(248,461)</u>	<u>(1,938,998)</u>	-6.3%	2.4%
2012	26,128,846	2,016,684	(5,488,392)	(212,044)	2,610,976	10.3%	1.7%
Totals		\$ 28,177,443	\$(64,414,385)	\$(3,588,654)	\$ 18,995,644		

5-year average 0.9% -0.1%
 14-year average 3.9% 2.5%

The average return on the market value of assets for the 14 years ending December 31, 2012 is 3.9%. Unfavorable returns in the years 1999-2002, 2004, 2005, 2007, 2008 and 2011 have largely impacted this average, which is much lower than the assumed rate of 6.75%.

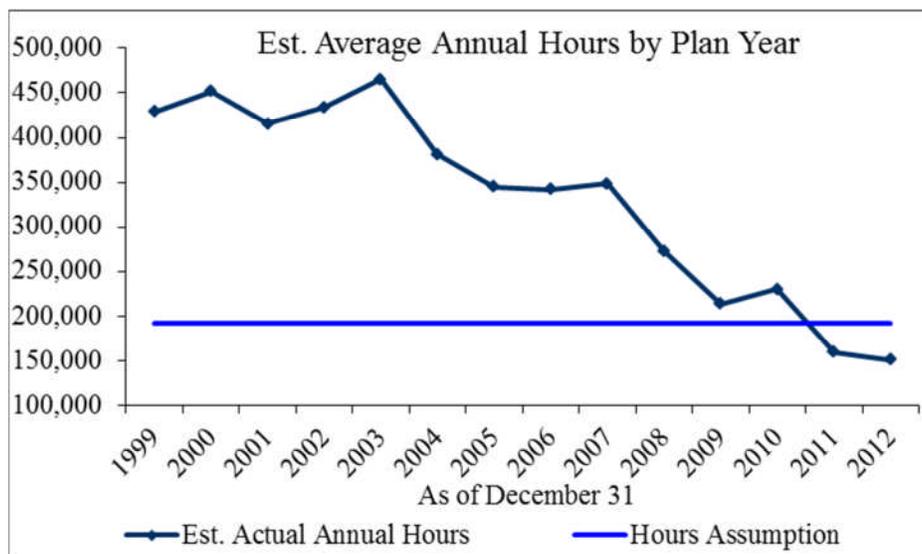

The performance of the actuarial and market value of assets as measured by the rate of return over the last 14 years is lower than the market value performance. As seen in the table above, the market value return in 2012 was 10.3%. On an actuarial basis, this 2012 return will be recognized over a five-year period.

4.5.3 Employment

Plan Years Ending <u>Dec 31</u>	Contribution <u>Income</u>	Average Number <u>of Actives</u>	Average Hourly Contribution <u>Rate</u>	Employment Hours for <u>Valuation*</u>
1999	\$ 1,582,312	465	\$ 4.30	429,102
2000	1,951,078	364	4.35	451,551
2001	1,746,713	298	4.00	415,472
2002	1,776,555	307	4.22	434,189
2003	2,072,205	317	4.78	465,315
2004	1,920,424	313	5.39	381,478
2005	1,905,835	291	5.71	345,052
2006	2,035,681	277	6.31	341,557
2007	2,459,030	267	7.06	348,305
2008	2,228,212	245	8.17	272,620
2009	2,009,200	233	9.41	213,593
2010	2,480,621	225	10.78	230,167
2011	1,992,893	206	12.54	158,976
2012	2,016,684	192	13.39	150,611

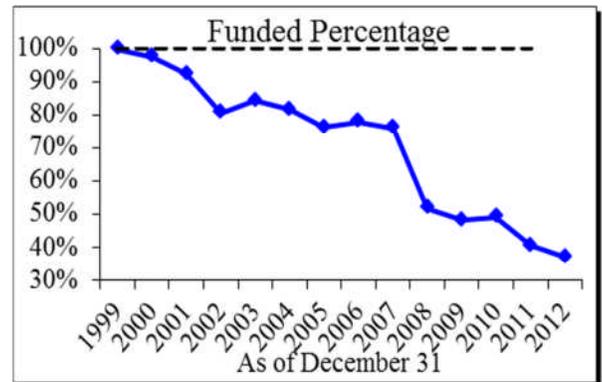

The employment assumption included in the valuation is 192,000 hours per year or 1,067 hours per year per active participant. This assumption should be set at a level that represents a long-term average.

***Total hours for valuation is derived by dividing actual contributions by last year's projected contribution rate, and will not necessarily match reported hours by the Plan Office.*

4.5.4 Funded Percentage

Plan Years Ending Dec 31	Market Value of Assets	Present Value of Accrued Benefits	Funded Percentage
1999	\$ 45,985,528	\$ 46,137,456	99.7%
2000	46,013,972	47,234,288	97.4%
2001	44,516,263	48,242,952	92.3%
2002	40,980,198	50,789,178	80.7%
2003	43,856,690	52,037,384	84.3%
2004	43,690,276	53,550,407	81.6%
2005	43,531,191	57,166,662	76.1%
2006	45,797,900	58,736,590	78.0%
2007	45,263,564	59,606,865	75.9%
2008	31,966,921	61,534,903	51.9%
2009	32,154,846	66,769,116	48.2%
2010	32,828,413	66,752,647	49.2%
2011	27,201,622	66,978,548	40.6%
2012	26,128,846	70,599,287	37.0%

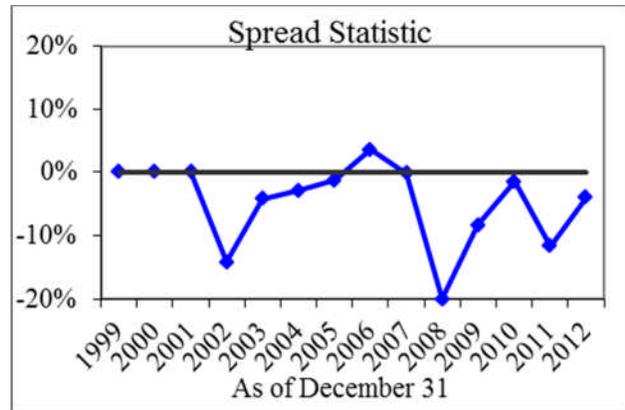

The Funded Percentage is a statistic commonly followed by Trustees. In the past, the ratio of the market value of assets to the Present Value of Accrued Benefits was highlighted. However, with the passage of the Pension Protection Act, the ratio of the actuarial value of assets to the Present Value of Accrued Benefits is used as one of the components to determine a plan’s status at each annual zone certification. In addition, this ratio will be used for annual participant notices. This Funded Percentage compares the actuarial value of assets to the value of benefits accrued as of the valuation date.

The fact that the Funded Percentage is under 100% means that there are unfunded accumulated benefits when valuing the Plan on an ongoing basis. It does not necessarily imply that the Plan is underfunded on a long term basis because it makes no consideration of future contributions relative to future costs. The margin is the best single statistic to get a sense of how well funded the Plan is on a long-term basis.

Based on the actuarial value of assets of \$27,162,775 the Funded Percentage is 38.5% as of December 31, 2012.

4.5.5 Actuarial Value of Assets Expressed as a % of Market Value

Plan Years Ending Dec 31	Actuarial Value of Assets	Actuarial Assets as a Percent of Market
1999	\$ 45,985,528	100.0%
2000	46,013,972	100.0%
2001	44,516,263	100.0%
2002	46,787,441	114.2%
2003	45,699,632	104.2%
2004	44,943,873	102.9%
2005	44,093,174	101.3%
2006	44,182,701	96.5%
2007	45,328,098	100.1%
2008	38,360,305	120.0%
2009	34,815,596	108.3%
2010	33,302,885	101.4%
2011	30,357,468	111.6%
2012	27,162,775	104.0%

The three primary measures that help an actuary assess how well funded a plan is on a long-term basis are:

1. Margin,
2. Gain/loss analysis and an assessment of assumptions, and
3. Spread, defined as the difference between the market and actuarial value of assets expressed as a percentage of the market value of assets.

The margin and assumptions were covered in earlier sections.

The third factor is the Spread statistic. When positive it represents a cushion to help offset potential future unfavorable investment experience. Conversely, when the actuarial value is greater than the market value the Spread turns negative. When this is the case future investment returns over and above the assumed return are necessary over time to restore the market value of assets equal to the actuarial value.

As of December 31, 2012, the Spread is -4.0%.

4.6 Pension Protection Act

The Plan continues to be in the Red Zone as of December 31, 2012 because it is under 65% funded and is projected to have a funding deficiency within the next four years. A summary of the Zone Status is as follows:

<u>Date Summary</u>		
<u>January 1</u>		<u>PPA Status</u>
2008	Status	Seriously Endangered
	Expiration of CBA(s) covering 75% of active participants as of actuarial certification date:	5/31/2008
	Funding Improvement Period: (15 years for Orange Zone):	1/1/2009-12/31/2023
2009	Status without regard to freezing	Critical
	Frozen Status (after application of WRERA)	Seriously Endangered
2010	Status	Critical
	Expiration of CBA(s) covering 75% of active participants as of actuarial certification date:	5/31/2011
	Adoption Period:	3/31/2010 - 12/31/2011
	Rehabilitation Period:	1/1/2012 - 12/31/2021
2011-2013	Status	Critical

The Trustees have implemented a Rehabilitation Plan (RP) as per the PPA. A summary of the history of the Rehabilitation Plan is as follows:

Original Rehabilitation Plan

Benefit Changes

- The Lump Sum option for surviving spouses was suspended effective April 23, 2010 as required by law.
- The benefit rate on and after January 1, 2010 will depend on the date on which the Participant first earned Future Service Credit. If that date is prior to June 1, 2004, the benefit rate will be \$50 (payable monthly) for all Years of Future Service Credit after December 31, 2009. Otherwise, the benefit rate will be \$37.50 for the first ten Years of Future Service Credit and \$50.00 for all subsequent service on and after December 31, 2009. The ten year period is measured from date of hire.
- A year of Future Service Credit is credited for each 1,000 hours, with 1/10 of a Year credited for each 100 hours worked. No Future Service Credit will be credited if less than 200 hours are worked in a Plan Year
- Unreduced Early Retirement at age 62 with 5 years of Vesting Service was replaced with unreduced Early Retirement at age 62 with 20 years of Future Service Credit, with no limitation on Service earned in each Plan Year.

Contribution Increases

Contrib.		Contrib.	
June 1	Rate	June 1	Rate
2010	\$11.34	2017	16.39
2011	13.39	2018	16.89
2012	13.39	2019	17.39
2013	14.39	2020	17.89
2014	14.89	2021	18.39
2015	15.39	2022+	18.89
2016	15.89		

2011 Update to the Rehabilitation Plan

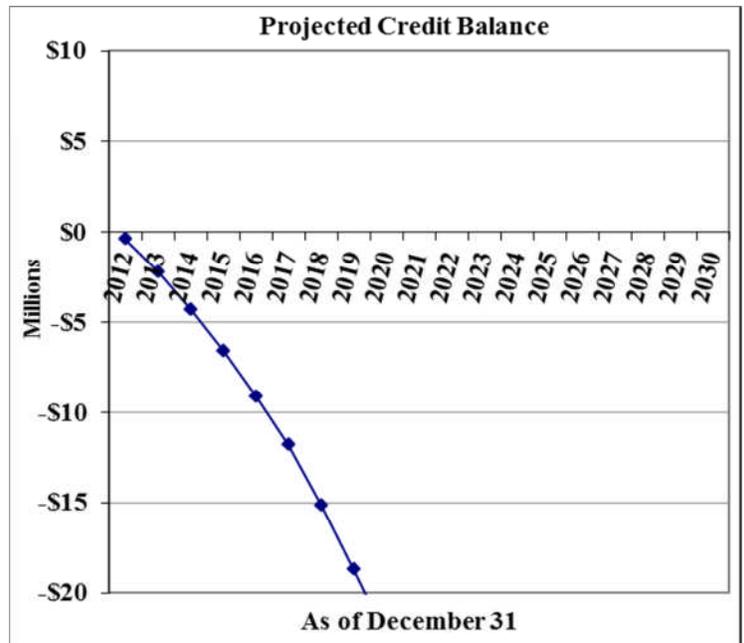

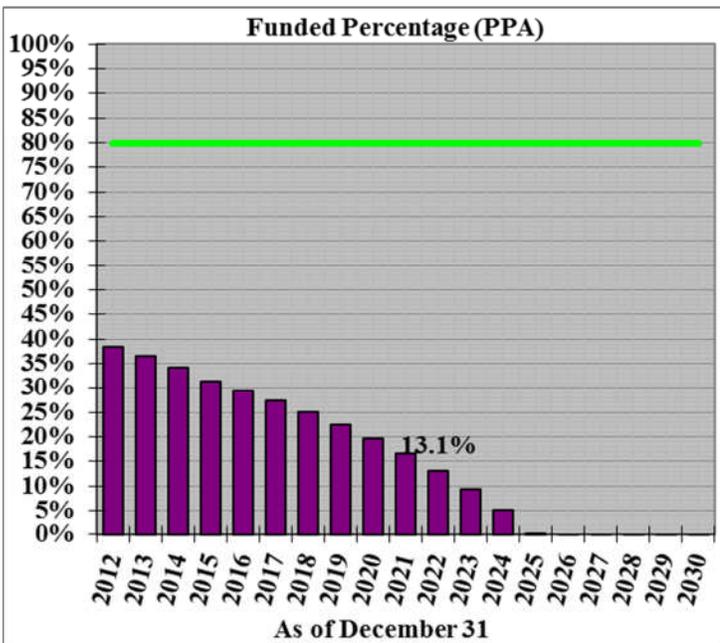

Effective January 1, 2012, accrued benefits will be frozen and will equal the benefit accrued through December 31, 2011.

2012 Update to the Rehabilitation Plan

Effective March 21, 2013, the Board of Trustees decided to freeze the contribution rate at \$13.39 and suspend the following benefits until 5/31/2017:

- a. All Early Retirement Benefits
- b. Disability Retirement Benefits
- c. The Family Survivor and Single Sum Death Benefit
- d. The “Pop Feature” on Joint & Survivor benefits

The following charts project the funded percentage and credit balance into the future assuming that there are no gains or losses on demographic assumptions and that the market value of assets returns the assumed rate of 6.75%.

5. ASC No. 960 Disclosures

5.1 Present Value of Accumulated Plan Benefits

As of December 31, 2012

A. Present Value of Vested Benefits:	
1. Participants currently receiving payments	\$ 48,074,753
2. Other vested benefits	<u>22,482,936</u>
3. Subtotal vested benefits	\$ 70,557,689
B. Present Value of Non-Vested Benefits	<u>41,598</u>
C. Present Value of Accumulated Benefits (A+B)	\$ 70,599,287

The ASC No. 960 values were computed using the same assumptions as those used for determining funding requirements.

5.2 Reconciliation of Changes in Present Value of Accumulated Benefits

A. Present Value of Accumulated Benefits at Prior Valuation Date	\$ 66,978,548
B. Changes During the Year Due to:	
1. Benefits accumulated and net gains	\$ 837,809
2. Benefits paid	(5,488,392)
3. Assumption changes	8,130,603
4. Method changes	0
5. Plan amendments	(4,516,272)
6. Passage of time	<u>4,656,991</u>
7. Total change	\$ 3,620,739
C. Present Value of Accumulated Benefits at Current Valuation Date	\$ 70,599,287

6. Government Reporting

6.1 Summary of Assumptions and Methods

These are the assumptions used for the ongoing valuation calculations, unless otherwise noted.

Mortality	RP- 2000 Sex Distinct Table with Blue Collar adjustment using scale BB improvement from year 2000.
Withdrawal	Table T-5
Disability	SOA 1973 Disability Model XXVI
Retirement Age	100% at age 65 for both Active and Inactive Vested Participants.
Definition of Active	A member must have worked 100 or more hours in the year to be included in the valuation.
Future Employment	1,000 hours
Percent Married	100%
Age of Spouse	Females are 2 years younger than their spouses.
Net Investment Return	6.75%
Administrative Expenses	\$280,000 payable at the beginning of the year
Actuarial Value of Assets	The market value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return and the expected return on the actuarial value, and is recognized over a five-year period. The actuarial value is further adjusted, if necessary, to be within 20% of the market value.
Actuarial Cost Method	Unit Credit

RPA '94 Current Liability Assumptions

Interest	3.78%
Mortality	RP-2000 as per IRC § 1.430(h)(3)-1

Assumption Changes

Mortality	RP- 2000 Sex Distinct Table with Blue Collar adjustment, using scale BB improvement from year 2000. Previously we used RP- 2000 Sex Distinct Table with Blue Collar adjustment set forward 3 years for males only, using scale BB improvement from year 2000.
Interest Rate	6.75%, last year we assumed 7.25%
Retirement Age	The retirement assumption was changed to 100% retiree at 65 for both Active and Inactive Vested Participants.
Future Employment	1,067 hours per year per active. Last year we assumed 1,000.
Administrative Expenses	\$285,000 payable at the beginning of the year. Last year we assumed \$280,000.

6.2 Summary of Plan Provisions

Plan Year:	January 1 through December 31
Participation	400 hours of covered employment
Vesting Service	One year for each year in which at least 250 hours of covered employment or 1,000 hours of related service is earned in a plan year; there is no partial credit
Future Service Credit	One-seventh of a year of Future Service Credit for each 100 hours of covered employment worked in a plan year, without limit.

Effective 1/1/2010, one-tenth of a year of Future Service Credit for each 100 hours of covered employment worked in a plan year, without limit, if at least 200 hours of credited service are earned in the plan year. For purposes of meeting eligibility requirements, no more than one year of Future Service Credit is recognized in any year

Vesting 100% vesting after 5 years of Vesting Service

Break In Service A "break year" is a plan year in which the participant earns less than 100 hours of eligibility service. After one break year (three consecutive break years prior to 2000) service and participation are forfeited if not vested. Such service and participation will be restored upon return to employment if 100 hours of Future Service Credit or 500 hours of vesting service are earned in a plan year, provided that the number of consecutive break years did not equal or exceed the greater of five years or the prior number of vesting years.

Normal Retirement:

Eligibility Age 65, with five years of Plan participation

Amount For retirements after 1/1/2010, the monthly accrued benefit is the sum of A and B where:

A. Prior to 12/31/1990, monthly accrued pension multiplied by a factor:

<u>Local</u>	<u>Factor</u>
29	100%
Others	115%

B. After 1/1/1991: a multiplier times Future Service Credit earned under this plan:
 Multiplier

<u>Group</u>	<u>1/1/1991- 12/31/2009</u>	<u>1/1/2010- 12/31/2011</u>	<u>After 12/31/2011</u>
If hired prior to 6/1/2004	\$75	\$50	\$ 0*
If hired on and after 6/1/2004	\$50	\$37.50 for the first 10 years of service then \$50 for each year in excess of 10.	\$ 0*

**As part of the Rehabilitation Plan, accrued benefits were frozen as of 12/31/2011.*

Normal Form Payable for life

Early Retirement: *Currently unavailable (i.e. "suspended")*

Eligibility Age 55 with 15 years of Future Service Credit (counting no more than one year in any plan year) or ten years of vesting service, or on or after 10/1/1996, age 62 with 5 years of vesting service.

Amount Normal Retirement amount reduced .25% for each month prior from age 65 to age 60 then .50% for each month prior from age 60 to age 55. There is no reduction under any of the following situations:

<u>Age</u>	<u>Years of Future Service Credit</u>
62	20
60	30*
58	35*

*For these eligibility purposes, no more than one year of Future Service Credit can be counted in any plan year.

Disability: *Currently unavailable (i.e. "suspended")*

Eligibility Under age 65 and 15 years of eligibility for disability level "A" (ten years of eligibility service for disability level "B") and receiving Social Security Disability benefits

Amount Same as normal for level "A" (if disability level "B", reduced by 1/4 of 1% per month that disability date precedes age 65 to a maximum reduction of 50%)

Deferred Vested Benefit:

Eligibility Ten (10) years of vesting service

Amount Accrued Normal Retirement amount commencing at first unreduced retirement age, or Early Retirement reduced amount if eligible prior to Normal Retirement

Pre-Retirement Surviving Spouse's Pension:

Eligibility Death of a vested participant with a surviving spouse of one year

Amount 50% of the benefit the participant would have received had he or she retired the day before he or she died and elected the joint and 50% survivor option. If the participant died prior to eligibility for an early retirement pension, the spouse's benefit is deferred to the participant's earliest retirement date.

Family Pension Death: *Currently unavailable (i.e. "suspended")*

Eligibility Vested

Amount Employer Contributions less any pension payments made payable over the life time of the named beneficiary

Optional Form of Benefit:

- 50% Joint and Survivor with Pop-up (*Pop-up is currently suspended*)
- 75% Joint and Survivor with Pop-up (*Pop-up is currently suspended*)

6.3 Plan History

Effective Date	Benefit Change
3/21/2013	<p>The following benefits will be suspended (i.e. unavailable) through May 31, 2017 for those Participants not yet in pay status as of March 21, 2013:</p> <ul style="list-style-type: none">e. *** Includes an 85¢ diversion from the Health and Welfare Fund*

6.5 Funding Standard Account and Minimum Required Contributions

Rules for determining minimum required and maximum deductible contributions are set forth in IRC Sections 412 and 404, respectively. Since deductibility may be affected by factors not considered here, the deductibility and timing of contributions should be reviewed with tax counsel.

	<u>Actual</u> <u>2012</u>	<u>Projected</u> <u>2013</u>
For Plan Year ending December 31:		
Charges to the Credit Balance:		
a. Normal cost	\$ 280,000	\$ 285,000
b. Amortization charges	4,772,697	5,701,717
c. Interest on a and b	<u>366,321</u>	<u>404,103</u>
d. Total charges	\$ 5,419,018	\$ 6,390,820
Credits to Credit Balance:		
e. Credit Balance at beginning of year	\$ 603,834	\$ (366,134)
f. Employer contributions	2,016,684	2,570,880
g. Amortization credits	2,165,429	1,815,213
h. Interest on above	<u>266,937</u>	<u>176,411</u>
i. Total credits	\$ 5,052,884	\$ 4,196,370
Credit Balance at end of Year	\$ (366,134)	\$ (2,194,450)
Minimum Required Contribution (d - (e + g) x (1.0725))	\$ 2,448,983	\$ 4,843,928
Minimum Without Regard to the Credit Balance (d - g x 1.0725))	\$ 3,096,595	\$ 4,453,080

The Plan's Credit Balance represents a cumulative measure of all prior contributions (since the initial ERISA effective date) against all prior minimum requirements. If cumulative contributions exceed cumulative minimums, then the Plan will maintain a Credit Balance which can be used to offset any current year minimum requirements. As of December 31, 2012, the Plan has a Credit Balance of \$(366,134). The minimum requirement for the year ending December 31, 2013 is \$4,843,928 after recognition of the Credit Balance.

6.6 Maximum Deductible Contribution

A. Traditional Maximum Deductible	\$ 6,417,346
B. 140% of Current Liability, less Actuarial Value of Assets	\$ 111,685,051
C. Greater of A or B	\$ 111,685,051

The maximum allowable deduction for the fiscal year ending December 31, 2013 is \$ 111,685,051. To be deductible for a given fiscal year, a contribution should be made by the time the tax return for that fiscal year is filed with the IRS (including extensions). Specific advice on the deductibility of contributions and timing should be reviewed with your tax counsel.

6.7 Current Liability at Beginning of Year

Current liability is the present value of accrued benefits under the Plan using actuarial assumptions as prescribed by the Retirement Protection Act of 1994 (RPA '94). The liability is determined using the same assumptions used to determine the Plan's funding requirements, except for the interest rate and mortality table. These values are used for specific, prescribed purposes.

RPA '94 Current Liability

A. Assumptions:	
1. Interest rate	3.78%
2. Mortality table	RP-2000 per IRC §1.430(h)(3)-1
B. RPA '94 Current Liability	
	<u>Total Benefits</u>
1. Retirees and beneficiaries receiving payments	\$ 59,587,019
2. Inactive vested participants	14,856,904
3. Actives	
(a) Non-vested benefits	89,537
(b) Vested benefits	23,282,377
(c) Total Active	\$ 23,371,914
4. Total (1 + 2 + 3(c))	\$ 97,815,837
C. Expected Increase in Liability	\$ 0
D. Expected Benefits Accruing During the Year	\$ 5,426,119

6.8 Amortization Schedule for Minimum Required Contribution
Amortization Charges as of 1/1/2013

<u>Date</u> <u>Established</u> <u>January 1</u>	<u>Base Type</u>	<u>Outstanding</u> <u>Balance</u>	<u>Years</u> <u>Remaining</u>	<u>Amortization</u> <u>Amount</u>
1998	Combined Charges	\$ 1,768,898	5	\$ 401,437
