

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 4022 and 4044

Benefits Payable in Terminated Single-Employer Plans; Allocation of Assets in Single-Employer Plans; Interest Assumptions for Valuing and Paying Benefits

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: The Pension Benefit Guaranty Corporation's regulations on Benefits Payable in Terminated Single-Employer Plans and Allocation of Assets in Single-Employer Plans prescribe interest assumptions for valuing and paying benefits under terminating single-employer plans. This final rule amends the regulations to adopt interest assumptions for plans with valuation dates in April 2002. Interest assumptions are also published on the PBGC's Web site (<http://www.pbgc.gov>).

EFFECTIVE DATE: April 1, 2002.

Harold J. Ashner, Assistant General Counsel, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street, NW., Washington, DC 20005, 202-326-4024. (TTY/TDD users may call the Federal relay service toll-free at 1-800-877-8339 and ask to be connected to 202-326-4024.)

SUPPLEMENTARY INFORMATION: The PBGC's regulations prescribe actuarial assumptions—including interest assumptions—for valuing and paying plan benefits of terminating single-employer plans covered by title IV of the Employee Retirement Income Security Act of 1974. The interest assumptions are intended to reflect current conditions in the financial and annuity markets.

Three sets of interest assumptions are prescribed: (1) A set for the valuation of benefits for allocation purposes under section 4044 (found in appendix B to part 4044), (2) a set for the PBGC to use to determine whether a benefit is payable as a lump sum and to determine

lump-sum amounts to be paid by the PBGC (found in appendix B to part 4022), and (3) a set for private-sector pension practitioners to refer to if they wish to use lump-sum interest rates determined using the PBGC's historical methodology (found in appendix C to part 4022).

Accordingly, this amendment (1) adds to Appendix B to Part 4044 the interest assumptions for valuing benefits for allocation purposes in plans with valuation dates during April 2002, (2) adds to Appendix B to Part 4022 the interest assumptions for the PBGC to use for its own lump-sum payments in plans with valuation dates during April 2002, and (3) adds to Appendix C to Part 4022 the interest assumptions for private-sector pension practitioners to refer to if they wish to use lump-sum interest rates determined using the PBGC's historical methodology for valuation dates during April 2002.

For valuation of benefits for allocation purposes, the interest assumptions that the PBGC will use (set forth in appendix B to part 4044) will be 5.50 percent for the first 25 years following the valuation date and 4.25 percent thereafter. These interest assumptions represent a decrease (from those in effect for March 2002) of 0.10 percent for the first 25 years following the valuation date and are otherwise unchanged.

The interest assumptions that the PBGC will use for its own lump-sum payments (set forth in appendix B to part 4022) will be 4.25 percent for the period during which a benefit is in pay status, and 4.00 percent during any years preceding the benefit's placement in pay status. These interest assumptions represent a decrease (from those in effect for March 2002) of 0.25 percent for the period during which a benefit is in pay status and are otherwise unchanged.

For private-sector payments, the interest assumptions (set forth in appendix C to part 4022) will be the same as those used by the PBGC for determining and paying lump sums (set forth in appendix B to part 4022).

The PBGC has determined that notice and public comment on this amendment

are impracticable and contrary to the public interest. This finding is based on the need to determine and issue new interest assumptions promptly so that the assumptions can reflect, as accurately as possible, current market conditions.

Because of the need to provide immediate guidance for the valuation and payment of benefits in plans with valuation dates during April 2002, the PBGC finds that good cause exists for making the assumptions set forth in this amendment effective less than 30 days after publication.

The PBGC has determined that this action is not a "significant regulatory action" under the criteria set forth in Executive Order 12866.

Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

31 CFR Part 203

RIN 1510-AA79

Payment of Federal Taxes and the Treasury Tax and Loan Program

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Final rule.

SUMMARY: The Department of the Treasury (Treasury) is amending the regulation governing the Treasury Tax and Loan (TT&L) program, to provide the Secretary greater flexibility to adjust the rate of interest we charge on funds loaned through the existing TT&L investment option. In addition, Treasury is making regulatory changes that will allow us to test the feasibility of a new investment option known as the term investment option. The term investment option would provide financial

institutions participating in the TT&L investment program with another option for borrowing Treasury funds. Under the term investment option, Treasury may invest excess balances with TT&L participants at a market based rate of interest for a predetermined period of time.

DATES: This final rule is effective April 15, 2002.

SUPPLEMENTARY INFORMATION:

Background on the Treasury Tax and Loan Program

The Treasury Tax and Loan (TT&L) program, 31 CFR part 203 (part 203), encompasses two separate components—a depository component through which we collect Federal tax deposits and payments from business taxpayers for employee withholding and other types of taxes, and an investment component through which we invest short-term operating balances not needed for immediate cash outlays.

Through the TT&L depository component, which comprises nearly 10,000 commercial financial institutions and Federal Reserve Banks (FRBs), we collected over \$1.6 trillion in Fiscal Year 2001, representing approximately 80 percent of the total Federal annual tax receipts, from approximately 5 million business taxpayers.

Nearly 1,400 of the TT&L depositories borrow excess short-term Treasury operating funds by participating in the investment component of the TT&L program. Through agreements executed under this Part, participating depositories borrow Treasury funds in the form of a note secured with collateral pledged to Treasury and pay interest to the Treasury on these balances. In Fiscal Year 2001, we earned nearly \$1 billion in interest income through the TT&L investment component.
