Beginning in FY 2009, PBGC started to report premium income net of bad debt expense for premium, interest, and penalties.
The number of payees includes those receiving a periodic pension benefit payment and those who received a
lump-sum beneft payment from PBGC during FY 2011.
*Less than $\$ 500,000$.
Due to rounding of individual items, numbers may not add up exactly across columns.

Due to rounding of individual items, numbers may not add up across columns.
Trusteed terminations include plans pending trusteeship.
Claims figures shown in this table are calculated on a plan basis and identified with fiscal year of plan termination for each plan.
The annual numbers of trusteed terminations shown in this table may differ from those reported elsewhere as they reflect the fiscal year of plan termination rather than the fiscal year in which the loss was incurred. For example, PBGC became responsible for 152 underfunded terminated plans during FY 2011, but only 45 of these plans had termination dates during FY 2011.
The rest had termination dates in earlier fiscal years and are allocated to those years.
The annual numbers of standard terminations shown in this table may differ from those reported in previous years as they now represent the number of termination cases that were closed during the fiscal year, while earlier years show the the number of standard termination applications received.
Values are subject to change as PBGC completes reviews, establishes termination dates, and determines recoveries.

Claims calculations represent aggregated and average counts of plans, claims, and participants over the period 1975-2011.
The number of vested participants and claims values are calculated as of date of plan termination.
Claims in 2011 dollars are calculated using Consumer Price Index - Urban Consumers.

Lump-sum payments include cash-outs of pensions with de minimis present values and back payments to current pensioners.
Since some payees received both pensions and lump-sum payments, total number of payees may be less than the sum of pensioners and lump-sum recipients.
Excludes participants in plans that are in probable termination status as of end of fiscal year.
Due to rounding of individual items, numbers may not add up across columns.

Hybrid plans incorporate elements of both defined benefit and defined contribution plans but are treated as defined benefit plans. They often
express benefits in terms of an account balance. The two most common types of hybrid plans are Cash Balance Plans and Pension Equity Plans.
2010 figures are estimates from PBGC internal calculations. 2009 figures reported last year have been updated to reflect actual Form 5500 filings.

Hybrid plans incorporate elements of both defined benefit and defined contribution plans but are treated as defined benefit plans. They often
express benefits in terms of an account balance. The two most common types of hybrid plans are Cash Balance Plans and Pension Equity Plans. Because most hybrid plans converted from traditional defined benefit plans, not all participants will receive benefits based on the hybrid plan design. 2010 figures are estimates from PBGC internal calculations. 2009 figures reported last year have been updated to reflect actual Form 5500 filings.

* Only vested liabilities are used when determining underfunding for variable-rate premium payment purposes. Prior to July 1, 1996, the variable-rate premium was capped at various levels. Effective beginning with the 2007 plan year, a cap was imposed on the variable-rate premium for plans of small employers. If all contributing sponsors to the plan and their controlled group members have 25 or fewer employees, the per-participant variable-rate premium for that plan will be capped at $\$ 5.00$ times the number of participants in the plan. (The cap for the plan as a whole is effectively $\$ 5.00$ times the square of the number of plan participants.) Effective beginning with the 2008 plan year, an exemption that allowed some underfunded plans to escape payment of the variable-rate premium was eliminated and a modification was made to how underfunding is determined for variable-rate premium purposes.
** Applies to certain distress or involuntary pension plan terminations that occur after 2005. For certain airline-related plans that terminate within five years of electing to be covered under special funding rules, the annual termination premium (payable for three years) is $\$ 2,500$ per participant.
*** Beginning in 2007, this amount is adjusted annually based on changes in the national average wage index (as defined in section 209(k)(1) of the Social Security Act). The premium rate will not decline even if the national average wage index declines. The adjusted premium rate is rounded to the nearest multiple of $\$ 1$.

** Interest rates for valuing vested benefits for PBGC variable-rate premium for plans with premium payment years beginning in January of the respective year.
*** Beginning in 2008, plans were required to use spot segment interest rates published by the IRS for calculating a plan's vested liabilities to determine their variable-rate premiums. The first segment rate applies to benefits expected to be paid within five years, the second to benefits expected to be paid from five to twenty years in the future, and the third to benefits expected to be paid more than twenty years in the future.

## Definitions:

(A) Underfunding calculated from Internal Revenue Service Form 5500 Series Filings for single-employer plans. Vested liabilities have been adjusted to the PBGC rate that, along with an assumed mortality table, reflects the cost to purchase an annuity at the beginning of the relevant year. The assumed mortality table was UP-84 for 1980-1992, GAM-83 for 1993-2006, and the mortality table found in section 1.412(I)(7)-1 of the Income Tax Regulations for 2007 and later. Funding information from PBGC premium filings were used in 2008 whenever Form 5500 data was not available. Vested liabilities are used asa proxy for PBGC-guaranteed benefits.
(B) Underfunding data from PBGC premium filings used to calculate the variable-rate premium. Underfunding is based on vested benefits.
(C) Data from filings made under Section 4010 of ERISA, which requires that companies annually provide PBGC with information on their underfunded plans. For the 2007 and earlier plan years, the filing was required if aggregate underfunding exceeded $\$ 50$ million or there was an outstanding lien for missed contributions exceeding $\$ 1$ million or an outstanding funding waiver of more than $\$ 1$ million. For later plan years, a filing is required if plans are less than 80 percent funded in the aggregate. Underfunding for years before 2010 is based on an estimate of vested benefits. Beginning in 2010, underfunding is based on total benefit liabilities.
(D) Underfunding for plan sponsors with less than investment-grade bond ratings. Underfunding is based on estimated vested benefits.
(E) Estimated total liabilities are based on all plan liabilities, whether vested or not.

Only (A) and (E) represent the universe of PBGC-insured plans. Firms and plans included in the column (B), (C) and (D) totals may differ from year to year.
See "Underfunding Measures in Table S-47" in the Pension Insurance Data Book 2005, pp 16-23, for a further explanation of these measures.

Industry classifications are based on principal business activity codes used in the North American Industry Classification System.

* Vested liabilities have been adjusted to the PBGC rate that, along with an assumed mortality table, reflects the cost to purchase an annuity

The Employee Retirement Income Security Act of 1974 (ERISA) mandates that the maximum guaranteed amounts be adjusted annually based on changes in the Social Security contribution and benefit base. The 2010 and 2011 guarantees are the same as for 2009 because the bases did not increase in either year.
The maximum guarantee shown applies to workers who retire at age 65. PBGC increases the maximum guarantee for people retiring later than age 65 and reduces it for retirees taking earlier retirement or electing survivor's benefits.
In some instances, where a pension plan has adequate resources or PBGC recovers sufficient amounts, a participant may receive benefits in excess of the maximum guarantee.
The Pension Protection Act of 2006 provides that if a plan terminates while the sponsor is in a bankruptcy entered into after September 16, 2006, the applicable guarantees will generally be those for the year the sponsor entered bankruptcy regardless of the year the plan actually terminates.

(1) A number of plans received financial assistance in more than one year.
(2) Lump-sum payments were made to these insolvent multiemployer plans to facilitate mergers and closeouts.
(3) These plans received periodic payments before receiving lump-sum payments.
(4) Three of these five plans received periodic payments before receiving lump-sum payments.
(5) Two of these plans received small lump-sum payments to finalize closeouts initiated in 2008. These two plans are not included with plans receiving a lump-sum payment for 2009.
(6) Six of these seven plans received periodic payments before receiving lump-sum payments.
(7) Total for plan columns represents the total number of multiemployer plans that ever received the stated type of financial assistance from PBGC's Multiemployer Insurance Program.
(8) Only one plan has repaid any of its past financial assistance. That plan repaid only the principal amount of the loans it received.

| Table M-15 <br> PBGC Maximum Guaranteed Benefits (1980-2012) Multiemployer Program |  |  |  |
| :---: | :---: | :---: | :---: |
| Date of Plan Insolvency | Monthly Benefit Formula | Maximum Monthly Guarantee (30 Years of Service)* | Maximum Annual Guarantee ( 30 Years of Service)* |
| September 27, 1980, to December 21, 2000 | The participant's years of service multiplied by the sum of: <br> (1) $100 \%$ of the first $\$ 5$ of the monthly benefit accrual rate -plus- <br> (2) $75 \%$ of the next $\$ 15$ of the monthly benefit accrual rate | \$487.50 | \$5,850.00 |
| On or after December 22, 2000** | The participant's years of service multiplied by the sum of: <br> (1) $100 \%$ of the first $\$ 11$ of the monthly benefit accrual rate -plus- <br> (2) $75 \%$ of the next $\$ 33$ of the monthly benefit accrual rate | \$1,072.50 | \$12,870.00 |

* The formula presumes that the workers' monthly benefits are calculated by multiplying the monthly benefit accrual rate (a plan-specified dollar amount) times years of service. If the monthly benefit accrual rate prior to December 22, 2000, was less than $\$ 20$ per year of service or if the accrual rate after December 21, 2000 is less than $\$ 44$ per year of service then the maximum benefit guarantee for a participant with 30 years of service will be lower than the amounts shown. Note that there is no cap on applicable years of service; 30 years was selected for illustrative purposes only.
** The increased guarantee does not apply to multiemployer plans that received financial aid from PBGC between December 22, 1999, and December 21, 2000. The original, lower monthly benefit guarantee continues to apply to participants in these plans.

| Table M-16 <br> PBGC's Historic Premium Rates Multiemployer Program |  |
| :---: | :---: |
| For Plan Years Beginning | Premium Rate (per participant) |
| September 2, 1974 - August 31, 1979 | \$0.50 |
| September 1, 1979 - September 26, 1980 | $\$ 0.50$ for plan years beginning in September 1979, growing gradually to $\$ 1.00$ for plan years beginning September 1, 1980, to September 26, 1980 |
| September 27, 1980 -September 26, 1984 | \$1.40 |
| September 27, 1984 -September 26, 1986 | \$1.80 |
| September 27, 1986 - September 26, 1988 | \$2.20 |
| September 27, 1988 - December 31, 2005 | \$2.60 |
| 2006-2007 | \$8.00* |
| 2008-2012 | \$9.00 |

* Beginning in 2007, this amount is adjusted annually based on changes in the national average wage index
(as defined in section 209(k)(1) of the Social Security Act). The premium rate will not decline even if the national
average wage index declines. The adjusted premium rate is rounded to the nearest multiple of \$1.
